

Design and Manage Your Custom Labels In-House

with CQL Pro Labeling Software

 **AstroNova®**

 QuickLabel  GetLabels  TrojanLabel

When it comes to labeling products, it's no secret that in-house labeling software improves efficiency, saving time and money by effortlessly managing the combination of artwork and data in label files.

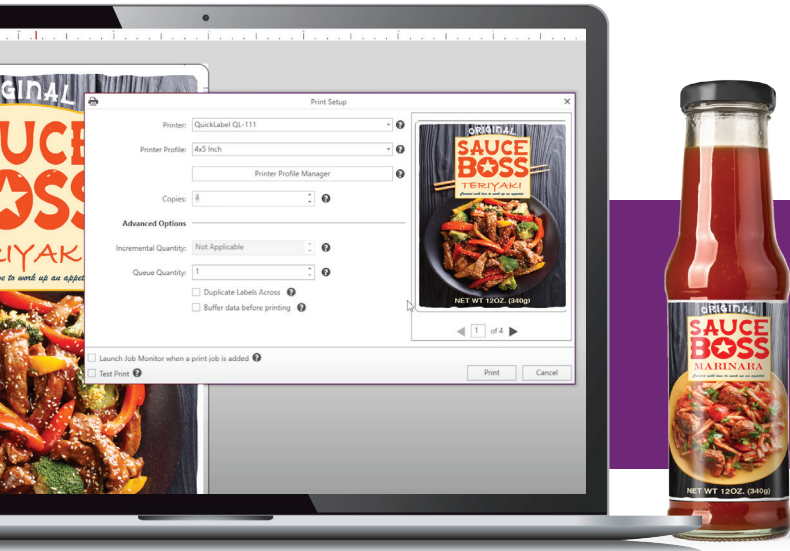

Having an in-house labeling solution like CQL Pro allows you to control your entire design and labeling process – from start to finish.

The right software makes all the difference. Read more on this powerful software solution and how it can help!

CQL Pro, AstroNova's advanced labeling software, allows users to:

- Easily design, edit, and print custom labels and label designs
- Design printer profiles
- Monitor or create print jobs across any label printer model
- Print directly from **CQL Pro** to your printer – in-house, all the time

Additionally, **CQL Pro** professional labeling software is compatible with any label printer on the market with a Windows® driver, regardless of the model or brand.

Key Features Include:

Built-in print manager, label designer, and printer profile manager

An intuitive interface, making it simple to create and access your label files

Create information-rich labels by choosing from a wide range of customizable text fields, graphic images, and barcodes — all with a live preview

Clearly monitor in-progress print jobs

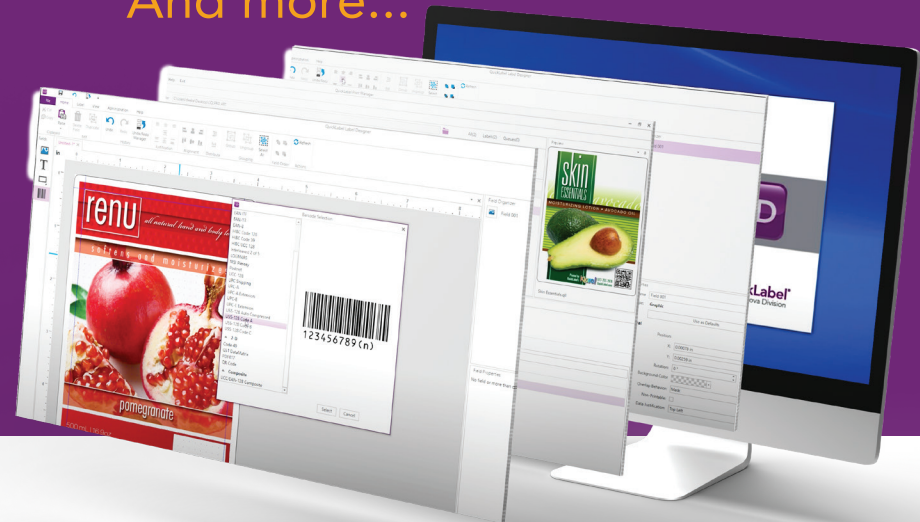

Create or open multiple labels to generate variations quickly

Live data previews

And more...

Why do you need a Labeling Software?

Quality labeling software can save a business time and money and increase in-house efficiencies.

With CQL Pro, artwork can exist in a variety of image types like png, jpg, pdf, tif, gif, etc. Data can come from various data sources such as your company's ERP or another external database. Also, add other common label elements, such as barcodes, QR codes, date of manufacture, expiration dates, lot codes, etc.

From start to finish, the labeling process can be timely, expensive, and cumbersome – but it doesn't have to be. Like with anything, the more you understand the labeling process in its entirety, the more you can integrate efficiencies.

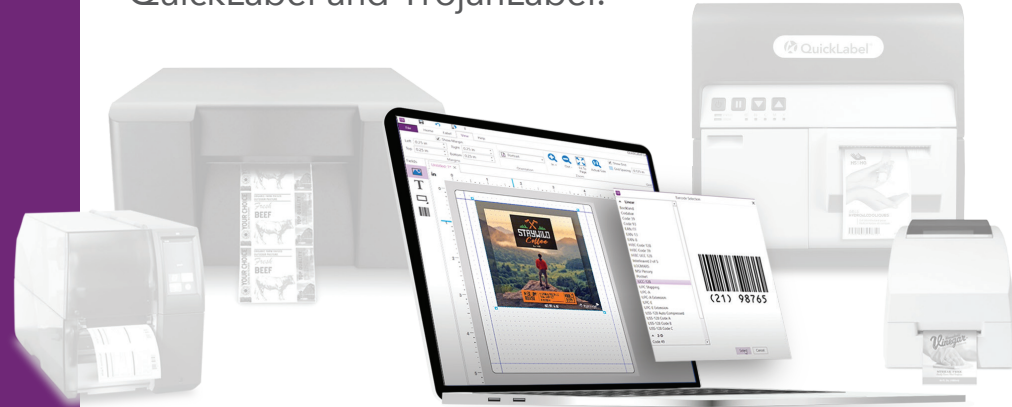

With CQL Pro, label design is easier than ever.
