

# *The Perfect Overprinting Solution*

## T3-OPX

In today's environment, many businesses are reviewing their models and looking for opportunities. There are benefits to bringing equipment into production that provides quick turn-around and flexibility without relying on other suppliers.

Introducing the TrojanLabel® T3-OPX. An innovative solution for high-quality, full-color printing directly onto materials with ink-receptive surfaces such as cardboard, postcards, boxes, paper bags, wooden planks, and more. Adding value, interest, shelf appeal, and customization to products has effectively increased profit margins. Learn more about how this revolutionary system can help your business!

# What Makes the T3-OPX Different?

Leveraging new, advanced technology, the T3-OPX can accommodate a wide range of materials, including:

- Cardboard
- Postcards
- Boxes
- Paper bags
- Fabric bags
- Cartons
- Wooden Planks
- Blister envelopes
- Folded boxes

Traditionally, inkjet printing is very sensitive to the distance between nozzles and substrates – severely limiting the substrates that can be utilized with a printing solution. However, the T3-OPX allows for durable printing on a variety of diverse uncoated materials.

*Don't see your packaging need listed above? Contact [info@astronovaproductid.com](mailto:info@astronovaproductid.com) and inquire whether the T3-OPX is the right fit for your application.*

# Quick Changeovers

Time is valuable. That's why the T3-OPX employs a unique automatic height calibration routine that senses the substrate thickness to adjust for accurate print height, enabling substrate changeovers in less than two minutes.

## ***Superior Durability***

Featuring extremely durable pigmented aqueous inks and economical cartridges, the T3-OPX provides outstanding print quality and offers significant cost savings over the lifetime of the printer. These durable inks provide lightfastness, water durability, and scratch resistance.

# Wide Print Width

With a print width up to 11.7 inches, the T3-OPX expands your printing capabilities.

Additionally, short-run possibilities are expanded as this solution is robust enough to print on a wide variety of finished substrates of varying thicknesses.

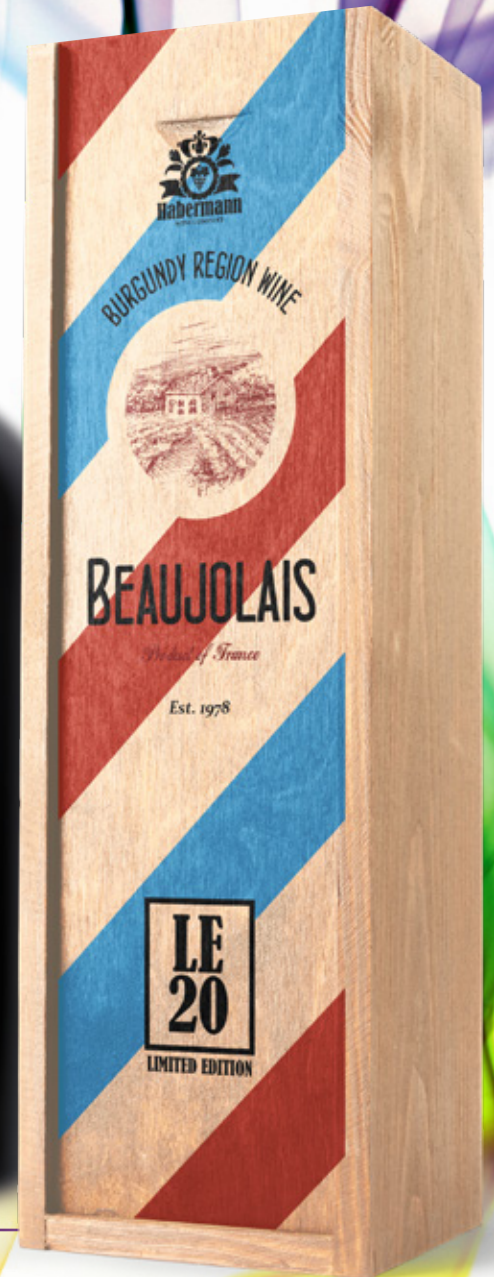

# Versatility

Easily expand your current products and services to attract new and existing customers. With the T3-OPX, you can offer:

- Private labeling
- Seasonal products
- Promotional products
- Limited time offerings

As it's proven an appealing selling point to consumers, some businesses have been encouraged to customize paper bags, others custom print pizza boxes, and AstroNova has seen customer success in the wine industry as custom printing wooden boxes for special occasions or limited releases have also proven worthwhile.

# State-of-the-Art Software

In today's world, now more than ever, enjoy the perks of TrojanControl Software, included with every T3-OPX. The TrojanControl interface allows a Tech Support professional to access your system remotely and diagnose any problems. Additionally, a built-in cost calculator makes it easy to review and manage operating costs.

# High-Quality Productivity

Designed for 24/7 production, the T3-OPX mounts on host systems operating up to 18 ips (90 feet per minute); automatically adjusting for variances in speed, timing, and spacing. Integrated aerosol fans and an optional material cleaner help to maintain stable, high-quality production.

# AstroNova Understands Your Application

Today, thousands of manufacturers, processors, and retailers worldwide increase their sales revenue and profit margins by labeling in-house. With over 50 years of innovation and expertise, let AstroNova help your business grow in this expanding market and stay ahead of regulation changes by taking control of your labeling today!
